Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, drawn to a method, classified in class 705, subclass 10.
- II. Claims 27-29, drawn to a method, classified in class 705, subclass 10.
- III. Claims 30-50, drawn to a system and computer-readable medium, classified in class 705, subclass 11.

Invention I (1-26) has separate utility such as, developing an information flow model that models the flow of information through a process of an enterprise, wherein the information flow model defines at least one information component associated with the process; analyzing the information flow model to determine a potential benefit if the information component were digitized; and selectively digitizing the information component based on the determined benefit;

Invention II (27-29) has separate utility such as, identifying a set of processes within an enterprise; developing at least one cross-functional matrix that lists a set of information components associated with the processes and specifies an estimated use of the information components across functions within the enterprise; selecting at least one of the processes based on the cross-functional matrix; developing a first information flow model to model the selected process and the use of the information components associated with the selected process; developing a second information flow model to model the selected process if one or more of the set of information components associated with the selected process were digitized; comparing the first information flow

Art Unit: 3628

model and the second information flow model; and selectively digitizing the information components associated with the selected process based on the comparison; and

Invention III (30-50) has separate utility such as, a value modeler software module executing on a computing device, wherein the value modeler software module processes an information flow model that models the flow of information through a process of an enterprise, and calculates a metric of improvement for the process if at least one information component associated with the process were digitized.

Inventions I and II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions I, II, and III have different modes of operation and functions.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 3628

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Freda A. Nelson whose telephone number is (571) 272-7076. The examiner can normally be reached on Monday - Friday.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Hayes can be reached on 571-272-6708. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
